

# Apple

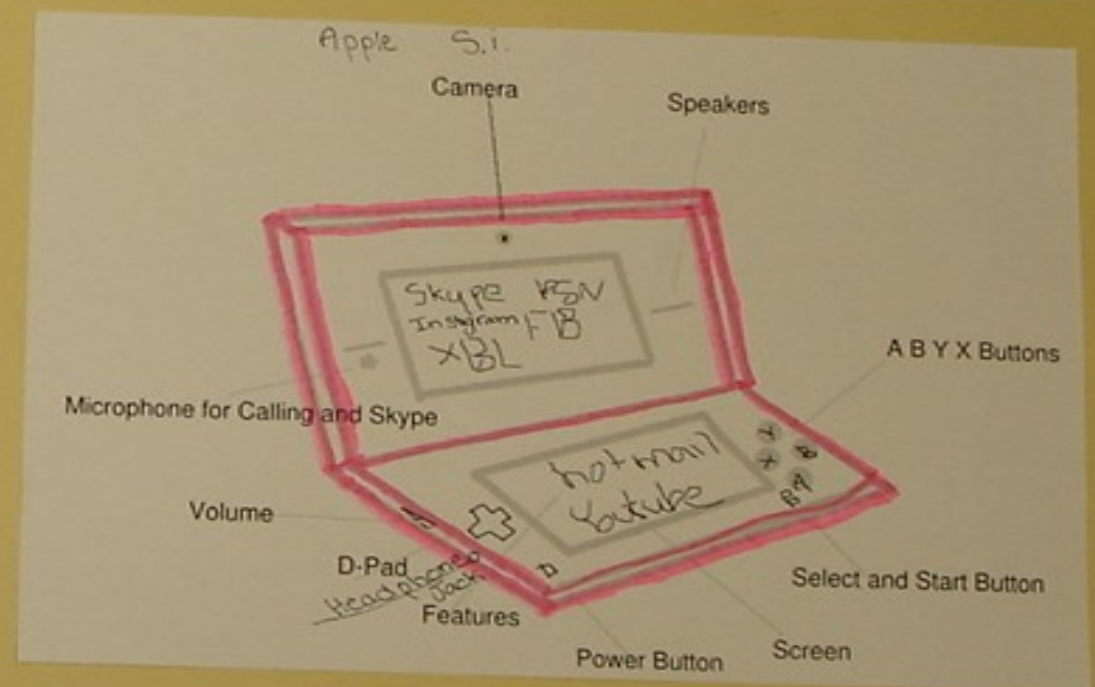

Gabriel Introduction December 19<sup>th</sup>, 2012

My Innovation Day project is about the next generation wireless gaming system. This would be great presents for children because we already KNOW that they just love Ipods, I pads, Nintendo DSi and other cool stuff. That means they will love this idea to! Anyways I hope you enjoy my presentation.

Features Page 2

There are many features to this project! The Apple S.i comes with: A built in PVR with 1080p, 16GB SD Card, 5000 pictures, 24 hour of recording for videos, ( the SD Card offers an extra 100 pictures and an hour extra of recording), Zelda Four Swords Anniversary and a all new pen that is exactly like a pencil! You can Rent games and buy them for cheaper than store bought, rent and buy movies to! When you rent or watch a movie you can watch it on any Apple computer or I pod touch! When you play games you earn points that is like money and you can buy movies and games with those points. It also comes with all of the original stuff from Nintendo DSi! I forget ultimate calling and texting. The games still look the same.

The Stylus Page 4

This stylus is spectacular! It may look like an ordinary pencil but it is a Apple S.i pen. They are really easy to make to if yours breaks or you lose it. You take a pencil and take apart a mechanical pencil and you take the end part of the mechanical pencil where the lead comes out to write and you push it onto the pencil so it can't come off.

How I thought of the idea Page 3

Do you wanna know how I came up with the idea? Well I like technology and talking about it. So all of a sudden my DSi popped into my head and I just thought how can I make it better? I was thinking it would be so cool if you could watch movies on a ds. The ideas just kept draining into my head. Thats how I came up with the idea!
