

# DISCOVERY!

The Rosetta Space Mission has made an astounding discovery...

However, before the news can be released to the public, the ESA must consider the ripple effects of this news and prepare explanations for the public.

As the highest ranking member of the ESA, you must prepare something to accomplish this. Your work must include the following features:

an explanation of the discovery

an outline of at least 3 consequences due to the discovery

tips and strategies for moving forward

Your 'something' can be chosen from the '101 Ways to Show What you Know' poster, but you must attempt something you have yet to do so far this year.
